

Oximio is an essential link in the clinical study lifecycle

Oximio optimises clinical trial supply chains, with consolidated logistics, clinical supply and patient-centric services. Focusing on Eastern Europe, Middle East and Africa, with a rapidly expanding GxP storage and services network in emerging markets, we've been delivering care for 18 years.

Services we provide:

Clinical Trial Logistics

- Customs clearance and IoR
- Depot and distribution
- Returns, accountability and destruction
- Bio-sample management

Sourcing for Clinical Trials

- Comparators
- Medicinal products
- Ancillaries and equipment

Patient-Centric Services

- Patient travel
- Patient outreach
- Adaptive logistics

As Oximio's partner, you can benefit from:

- Local expertise and compliance with global standards
- Reduced timelines, expedited start-ups and quick site reach
- Improved cold-chain management
- Supply chain optimisation via consolidated logistics solutions
- Centralised supply chain governance including global QMS, IT, and Finance

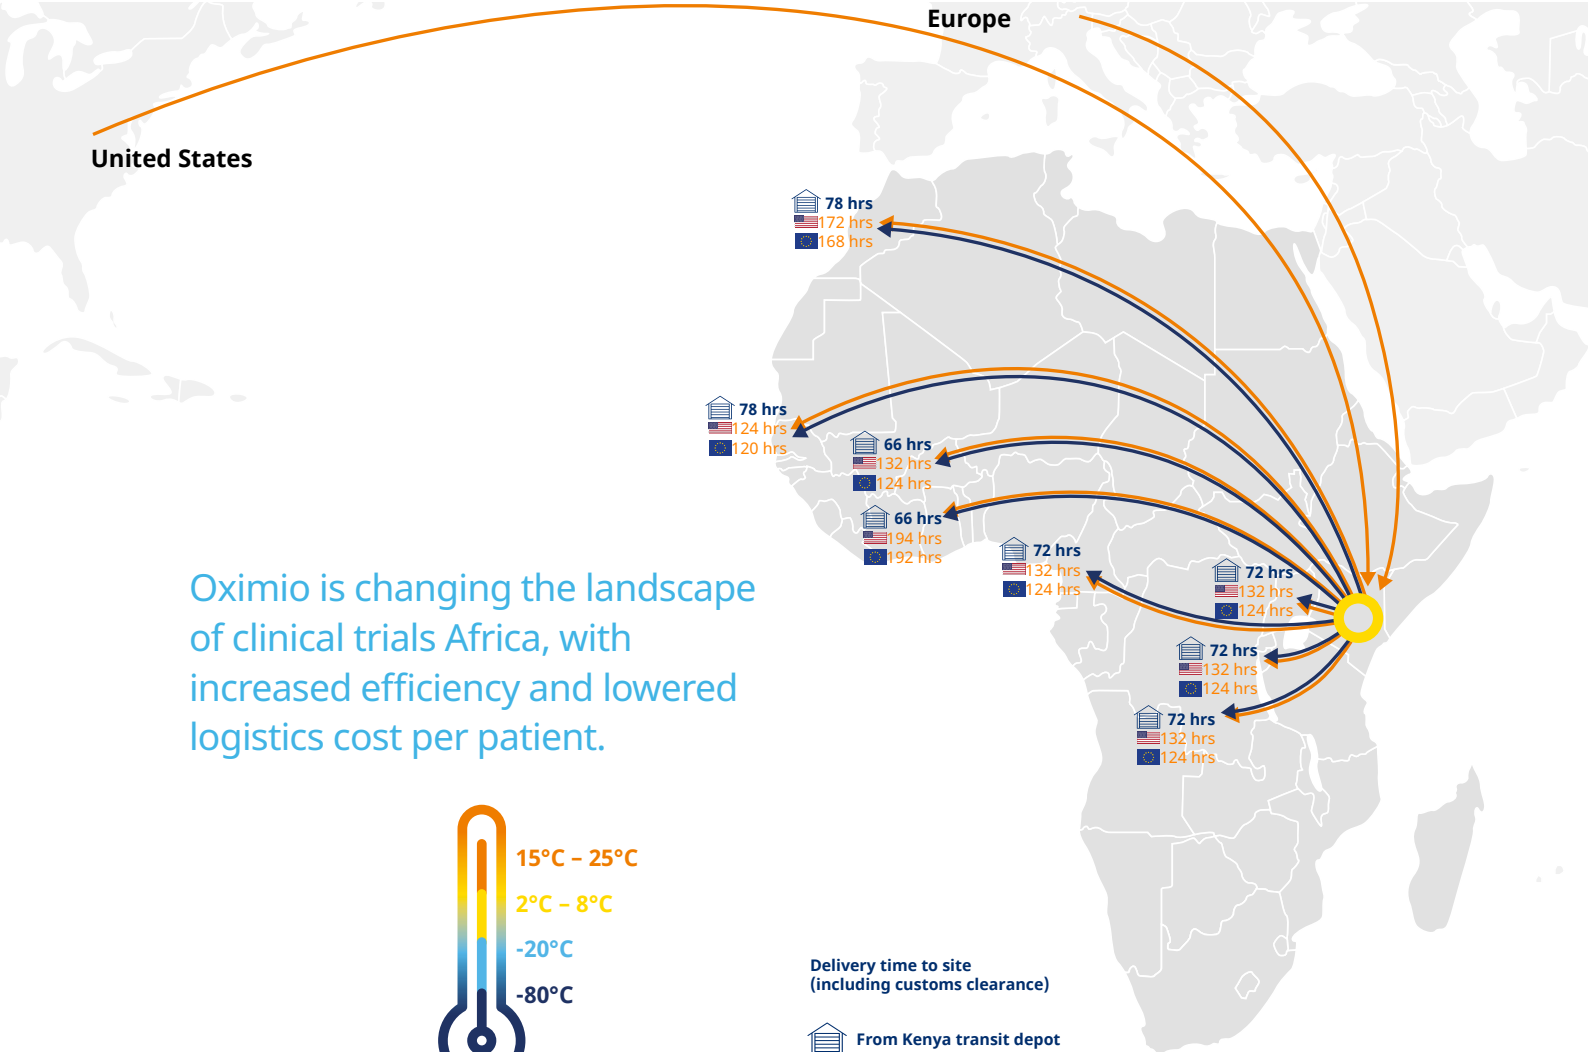

Deliver care with Oximio:

The Gateway into Africa

Supplying African sites via the bonded depot in Kenya is 54% quicker compared to the established direct-to-site models. Oximio also offers JIT relabeling per country, expedited customs clearance and rapid delivery.

Oximio is changing the landscape of clinical trials Africa, with increased efficiency and lowered logistics cost per patient.

End-to-End Cold-Chain Control System

Since 2018, Oximio has shaped the cold-chain infrastructure in Africa to improve quality and expedite the timelines of multinational clinical trials, while attracting more sponsors to the region, to reach greater patient populations.

Delivery time to site (including customs clearance)

- From Kenya transit depot
- Direct shipment from US
- Direct shipment from EU

Our IN2Africa service offers:

- Licensed warehouse
- Single import license application
- Rapid delivery methods
- IoR and import/export licenses
- Customs bonded depot
